Introduction

The Offender Entry website is a software program provided by the Iowa DCI Crime Laboratory to facilitate the collection of offender DNA samples. Iowa Code Chapter 81 requires all offenders under supervision convicted of a felony or a misdemeanor sex offense to submit a DNA sample for DNA profiling. In 2013, House File 527 was passed to include certain aggravated misdemeanors. Please refer to House File 527 for the specifics of this law, which goes into effect on July 1, 2014.

The Offender Entry website is to be used for the sole purpose of offender DNA collection. Any misuse of the program will result in the termination of a user's access to the program. Any identifiable information accessible through the Offender Entry website is to be kept confidential by the collection agencies and is only to be used to assist in determining if a sample needs to be collected or not. Iowa Code Section 81.6 sets out criminal penalties related to DNA records and samples. Any person who knowingly or intentionally discloses a DNA record to a person or agency that is not authorized to have access to the record can be charged with an aggravated misdemeanor. Anyone who uses or obtains a DNA record for an unauthorized purpose can be charged with an aggravated misdemeanor. Any person who knowingly or intentionally alters or attempts to alter a DNA sample, falsifies the source of a DNA sample, or materially alters a collection container used to collect the DNA sample can be charged with a class D felony.

Please contact the Iowa DCI Crime Laboratory's PCO Section at 515-725-1500 if you experience any difficulties with the Offender Entry website, or if you have any questions regarding any part of the offender DNA collection process.
